

ACA Rate Justification 2019

Maine: Though experience rating of this plan calls for a slight increase, rates reflect a rate hold to provide rate stability.

New Hampshire: Though experience rating of this plan calls for a slight increase, rates reflect a rate hold to provide rate stability, in an attempt to remove the undulations in rate changes required year after year.

Vermont: The rate hold is due to stable claims costs and administration from the experience period to the projected plan year.
